DETAILED ACTION

1. Applicant's 12/01/03 Request for Continued Examination, which that cancels claims 1-16 and adds new claims 17-23, is acknowledged. New claims 19 and 20, which correspond respectively to previously withdrawn claims 11 and 12, are similarly withdrawn from consideration in the current examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 17, 18 and 21-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 17 and 21 recite in the preamble the subcombination of "a device for discriminating nuclear fuels in an installation" that is inconsistent with the body of the claim that recites limitations directed to the combination of the device and the first cell of the installation. (Note that the new claims include the added limitation, "said means for positioning being provided at a base portion of the casing and penetrating in said cell in a fitting manner"). This inconsistency between the preamble and body of the claim presents the question as to whether the claim recites a combination or subcombination. There is also insufficient antecedent basis for the limitation that is directed to the combination rather than to the subcombination.

Art Unit: 3641

Claim 18 recites the limitation "the second detectors" in line 2. There is insufficient antecedent basis for this limitation in the claim.
